

Python Automation Script using File Handling and Exception Handling

OBJECTIVE

The objective of this project is to automate basic file handling operations using Python. The program creates folders and files, renames files automatically, and records the operations in a log file. This project demonstrates the use of the OS module, file handling techniques, user input, and exception handling in Python automation.

CODE

A screenshot of a Python IDE window titled 'TASK 1.py - C:\Users\DELL\AppData\Local\Programs\Python\Python314\TASK 1.py (3.14.3)'. The window contains a Python script that performs file operations: creating a folder, creating a file, renaming a file, and logging the operations. The script uses the 'os' module for file system operations and includes a try-except block for exception handling. The code is as follows:

```
import os

try:
    folder_name = input("Enter folder name: ")

    # Create folder
    os.mkdir(folder_name)
    print("Folder created")

    # Create file
    file_path = os.path.join(folder_name, "sample.txt")
    with open(file_path, "w") as file:
        file.write("This is internship task")
    print("File created")

    # Rename file
    new_file_path = os.path.join(folder_name, "renamed.txt")
    os.rename(file_path, new_file_path)
    print("File renamed")

    # Log file
    with open("log.txt", "a") as log:
        log.write("Operation completed successfully\n")
except Exception as e:
    print("Error:", e)
```

The status bar at the bottom right of the window indicates 'Ln: 29 Col: 22'.

OUTPUT

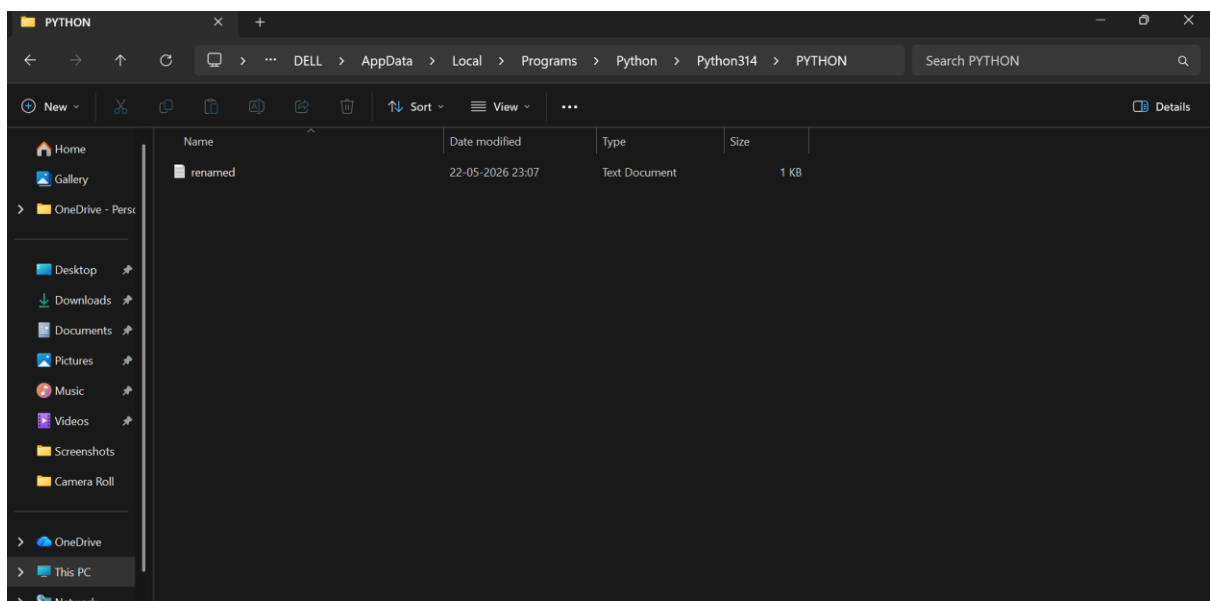

The screenshot shows the IDLE Shell 3.14.3 window. The menu bar includes File, Edit, Shell, Debug, Options, Window, and Help. The shell displays the following text:

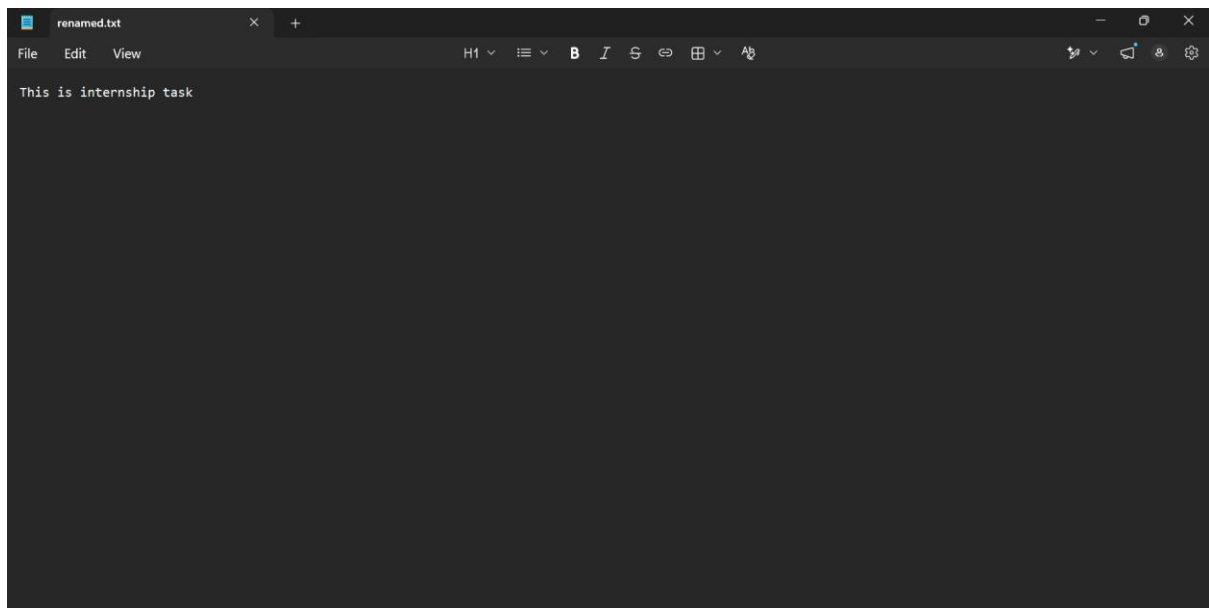

```
Python 3.14.3 (tags/v3.14.3:323c59a, Feb 3 2026, 16:04:56) [MSC v.1944 64 bit (AMD64)] on win32
Enter "help" below or click "Help" above for more information.
>>>
=== RESTART: C:\Users\DELL\AppData\Local\Programs\Python\Python314\TASK 1.py ===
Enter folder name: PYTHON
Folder created
File created
File renamed
>>>
```

The status bar at the bottom right indicates "Ln: 9 Col: 1".
